TECHNICAL SKILLS

- Basic Network Configuration Cisco
- Basic Database concept & SQL
- Basic Microsoft Excel

WORK TOOLS

- Microsoft Excel
- Cisco Packet Tracer
- Vs Code
- XAMPP

CORE WORK SKILLS

- Teamwork & Collaboration
- Adaptibility
- Active Listening & Communication

PROFILE SUMMARY

An Information Technology student focusing on Business Analysis For IT at PHINMA Cagayan de Oro College. Currently building skills in system documentation, database concepts, and academic coursework. Eager to apply foundational IT knowledge and technical skills to entry-level opportunities. Ready to contribute fresh perspectives and dedication to a collaborative team environment.

EDUCATION & CERTIFICATION

Bachelor of Science in Information Technology
PHINMA Cagayan de Oro College | 3rd Year

Deans's Lister
PHINMA Cagayan de Oro College | Previous Semester

PROJECTS

DEVELOPMENT OF A WEB-BASED ECU TUNING SERVICE AND SALES MANAGEMENT SYSTEM FOR RANAO MOTO

Academic Capstone Project Proposal | August 2026 - Oct 2026
System Analysis & Design | ERD modeling | System Documentation
Worked in a 4-person team to propose and structure a web-based management system designed to eliminate manual recordkeeping bottlenecks for Ranao Moto.

- *Defined project scope, objectives, and system architecture to address challenges in customer lookups, service tracking, and sales reporting.*
- *Created Entity-Relationship Diagrams (ERD) and use case models to map out database structures, user authentication rules, and role-based permissions for administrators and staff.*
- *Conceptualized core feature modules including ECU tuning job tracking (Pending, Processing, Completed), partial payment and balance monitoring, and sales analytics visualization using Chart.js.*

VIRTUAL MACHINE NETWORK & SURICATA INTRUSION DETECTION SETUP

Academic Project | Oct 2026
Oracle VirtualBox | Lubuntu | Ubuntu | Suricata |
Worked in a pair to configure network settings across three virtual machines in Oracle VirtualBox to monitor live traffic and test basic intrusion detection rules.

- Set up Suricata network monitoring software across the virtual machines to capture and log web browser traffic directed to target IP addresses and ports
- Executed Telnet commands and HTTP browser requests between the guest OS environments to test cross-network connectivity.
- Verified that alert logs accurately registered active network events and traffic detections within Suricata.

INTERACTIVE SPOT SHOES SALES & ANALYTICS DASHBOARD

Academic Project | Oct 2026
Microsoft Excel | Data Formatting | Pivot Reporting

- Partnered with a classmate to clean, structure, and visualize transactional sales records using the Spot Shoes dataset in Microsoft Excel.
- Organized raw dataset tables and created visual summary charts to highlight key performance metrics.
- Applied spreadsheet formulas and dynamic reporting layouts to make multi-year transaction data easy to filter and analyze
